## **TeamPad 700** Industrial Embedded XP Tablet PC Mobilise & Empower Your Workforce

Version 1.0  
Issued February 2010

Pages 2

### Introduction

The Fujitsu TeamPad 700 is a lightweight, ruggedised mobile Tablet PC with a large XGA touch display supported by the powerful Intel Atom® Processor and Microsoft Windows Embedded XP-based POSReady 2009®.

Integrated Wi-Fi and Bluetooth wireless capability support seamless connection to host or peripheral devices; and with its Secure Digital (SD) Card slot along with RS232 and USB ports, it can offer a wealth of expansion options for extra storage or connectivity.

With solid state media and a lightweight, ruggedized and splash-proof case, it is tough enough to withstand usage in the harshest environments. Its intelligent Lithium-Ion battery lasts for up to 6 hours supporting the busiest work schedules.

The TeamPad 700 offers users large-screen access to desktop or web-based applications whilst on the shop or warehouse floor, during doctors' rounds in a hospital or with field operatives completing administrative tasks whilst out on the road or doorstep.
